

## **From the Midwest to the Middle East: Debut Novelist Offers Fresh Insights into Israel**

***First Among Nations* captures the sights, sounds, tumultuous history, and modern realities of Israel**

**CLEVELAND, Ohio**—In *First Among Nations*, his debut novel, Ira Mosen—an American physician now living in Israel—tells the story of Zar, an ultra-Orthodox Jew, Egel, a secular Jew raised on a kibbutz, and Hajji, a Muslim Israeli-Arab. Despite their cultural and religious differences, the young men find common ground as soccer players on the Israel National Team vying for a World Cup championship.

In this richly detailed novel from Olive Blossom Press, Mosen explores the main characters' backstories and lives and portrays the Israel he has come to love.

When Mosen and his family moved to Israel two years ago, he was surprised by how much of a melting pot the country is and how well people of different religious and ethnic backgrounds get along. He saw it in the hospital where he worked, as doctors, residents and nurses laughed and teamed up to give excellent patient care. He saw it in the kind eyes of a hijab-wearing pharmacist who ensured that the medicine he was picking up was kosher for Passover.

These experiences inspired Mosen to focus on the themes of tolerance and collaboration in his novel. "My goal in writing this book is to find a common ground that binds us all together, to build bridges, and to change the conversation from a contentious one to one of mutual respect and understanding," he writes. "Ultimately, my goal is to help, in whatever tiny way I can, to promote peaceful coexistence. I pray every day for peace, and I thank God for His promise that peace—as elusive as it may seem—is, ultimately, attainable."

Mosen did most of the writing in flights and airports during the monthly work commutes he made from Israel to Ohio and back again for a year. The considerable time he spent in airports became a therapeutic exercise, one that is now paying off with glowing endorsements for his book.
